Redo exercise1 from chapter 7 but this time use AWT GUI to capture information of registering student see figure 01. The information are submitted when the Submit button is pressed.
The question was:
Write an application for student registration. Allow the user to enter firstname, last name, registration number and program of Study. An application should save the entered details for each student to a file called student_register.txt. The text file should have the format presented below:

Sno	First Name	Surname	Registration Number	Program_of_Study
1.	Ambwene	Gwantwa	2040-000-000002	Bsc. in Computer Science
2.	Eliwende	Abdulla	2040-000-000004	Bsc. in Computer Engineering
